PROJECTS

Milk Dairy Management System

📅 01/2022 - 04/2022

A project to manage milk dairy operations effectively

- Designed the user interface for easy data entry and navigation
- Integrated MySQL database to store and retrieve customer and milk transaction records
- Developed billing logic for daily/monthly milk supply

Development of Vertical Axis Wind turbine and solar power generation hybrid system

📅 08/2024 - 01/2025

A project focused on renewable energy generation

- Developed a functional model using VAWT and solar panels for off-grid power generation
- Enhanced power reliability by combining dual renewable sources

SUMMARY

I am a highly motivated Electronics and Telecommunication graduate eager to start my career in the field. With a solid foundation in embedded systems and communication protocols, I am keen to apply my skills in a growth-focused organization. I have hands-on experience in web development and strong project involvement, which equipped me with crucial skills that I look forward to leveraging in the professional world

EXPERIENCE

Intern – Web Development

Innovation Hub Private Ltd

📅 12/2023 - 02/2024 📍 Nashik

A company focusing on web development and innovative solutions

- Completed a 3-month internship focused on modern web development practices
- Worked with a team of developers to build and maintain client-based web applications
- Gained exposure to the full development lifecycle
- Designed and developed responsive webpages using HTML5, CSS3, JavaScript, and Bootstrap
- Assisted with backend development using PHP and MySQL for dynamic data-driven pages
- Implemented form validation and client-side scripting for enhanced user experience
- Supported UI/UX improvements based on client and team feedback

EDUCATION

Post Graduate Diploma in Advanced Computing (PG DAC)
